

# SAFETY BREAK AWAY KILL SWITCH

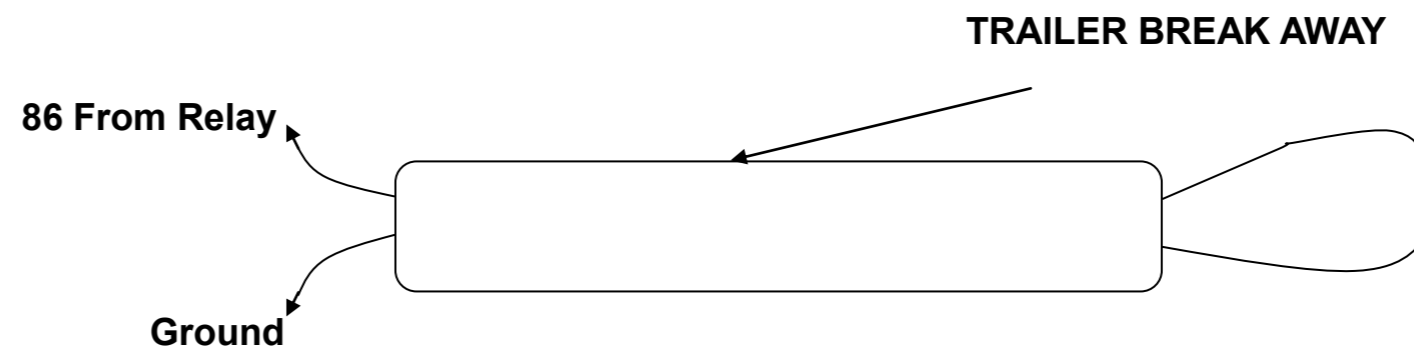

IGNITION 85+30

Relay = 1985 Chevy AC Relay

Breakaway = Trailer Break Away Switch

**MSD 7 - AL Box**  
Connect to the MAG on the Box

This safety breakaway switch is easy and economical way to shut off the truck at the end of the run. A 1/4 wire cable will be attached and this tether line will be set up to where the truck can make it out of the bog and then it will pull out and shut off the truck.

This works great indoors when driver is in trouble the truck with a stuck throttle.

There are no expressed guarantee or warranties implied. Safety is still in the hands of the operator. Drive Safe!
